The screenshot shows the Bristol-Myers Squibb website in a browser window. The address bar displays <https://www.bms.com/>. The browser's menu bar includes options like 'ファイル(F)', '編集(E)', '表示(V)', 'お気に入り(A)', 'ツール(T)', and 'ヘルプ(H)'. The website's navigation menu on the left lists: Bristol-Myers Squibb, Patients & Caregivers, Healthcare Providers, **Researchers & Partners** (highlighted with a red arrow and the Japanese text 'クリック'), Investors, Job Seekers, Media, Our Medicines, Life & Science Magazine, About Us, and United States. The main content area features a hero image of Merlene Rodgers, a two-time lung cancer survivor, with a text overlay that reads: 'Against the Odds', 'Two-time lung cancer survivor Merlene Rodgers is part of a new story being written about cancer care in Kentucky'. Below the text are two buttons: 'Read Her Story' and 'Explore All Stories'. The Windows taskbar at the bottom shows various application icons, system tray icons, and the date/time '10:38 2017/04/26'.

# Independent Research

**A**t Bristol-Myers Squibb, we are committed to providing innovative, high-quality medicines that strive to address the unmet medical needs of patients with serious diseases. Additionally, Bristol-Myers Squibb wishes to advance science through supporting novel, independent research that addresses unmet need surrounding our products and therapeutic areas.

We provide support across all phases of development spanning both interventional and non-interventional research. Independent research may be defined within the industry as Investigator Sponsored Research (ISR), Investigator Initiated Research (IIR), Investigator Sponsored Trials (IST) or Investigator Initiated Trials (IIT). The scientific and academic research community may submit a concept application for Investigator Sponsored Research (ISR) through our portal.

The ISR application process is done through an interactive portal allowing all concepts to come into Bristol-Myers Squibb via a simple, user friendly website. The ISR portal provides information required to successfully complete your concept submission and transparently enables you track the concept's progress through governance review. Through the internal governance process, concepts are periodically reviewed for scientific merit and alignment with our product strategy, among other factors. If the concept is endorsed, you may also use the ISR portal as it is a bi-directional gateway providing you with direct access to the internal Bristol-Myers Squibb support team.

Bristol-Myers Squibb strives to provide a response to your application within four weeks of submission to the portal. If governance endorses the concept, we expect a well-designed protocol to be submitted within 30 days of endorsement. Additional information and requirements can be found within the ISR portal. You may also submit any further Investigator Sponsored Research questions using our Investigator Inquiry Form.
